

Mega Catch™

The New Generation Mosquito Trap

PRO 900 Series

ALPHA

Coverage*

up to
0.5 acres

* measured in
optimum conditions

Mega-Catch™ - makers of the world's most advanced mosquito traps - introduce the latest product of their technological innovation: the PRO 900 Series.

There are more than 3,500 species of mosquitoes worldwide. Each species is unique and each is attracted by different combinations of sensory stimuli including different spectrum frequencies and different by-products of human and animal activity like perspiration. Even miniscule changes in the concentration of these stimuli can have an impact. In almost all cases it is important that stimuli fluctuate rather than be static in order to mimic human activity.

The new patent pending Mega-Catch™ PRO 900 Series ALPHA mosquito trap has been specifically designed with all these issues in mind.

PRO 900 Series ALPHA mosquito traps are ideal for use in small yards, patios and gardens and can attract mosquitoes and other biting insects from as far away as 90 feet.

Lightweight, compact and portable, the PRO 900 Series ALPHA incorporates the latest technology and some of the advanced features used in our top performing PRO 900 Series ULTRA, PREMIER XC and PREMIER models.

Features

- PRO 900 Series ALPHA Mosquito Traps successfully mimic the sensory signals which attract mosquitoes and other common biting insects like sand flies, black flies and biting midges (no-see-ums)
- Safe 12 Volt output cord (from weather proof power supply to trap). The PRO 900 Series ALPHA can be plugged into any mains power outlet
- Universal input voltage for use anywhere in the world
- Lightweight, compact and portable the PRO 900 Series ALPHA is rated for indoor/outdoor use
- Economical 24/7 operation - uses less power than a 20 watt light bulb
- Easy to operate. The PRO 900 Series ALPHA comes fully assembled - simply position, plug-in and switch on!
- Designed to work with or without attractant lures

Happiness is...a Mosquito Free Backyard

So if mosquitoes and other biting insects have taken over your backyard, the versatile ALPHA will help protect your family from these invasive, disease carrying pests.

The PRO 900 Series ALPHA is the ideal trap for use in small yards, patios and gardens.

Non-toxic, environmentally friendly and proven to work in independent scientific tests Mega-Catch™ mosquito traps are by far the safest most effective way to reclaim your yard.
