Mega-Catch™ - makers of the world's most advanced mosquito traps - introduce the latest product of their technological innovation: the PRO 900 Series.

There are more than 3,500 species of mosquitoes worldwide. Each species is unique and each is attracted by different combinations of sensory stimuli including different spectrum frequencies and different by-products of human and animal activity like perspiration. Even miniscule changes in the concentration of these stimuli can have an impact. In almost all cases it is important that stimuli fluctuate rather than be static in order to mimic human activity.

The new patent pending Mega-Catch™ PRO 900 series PREMIER mosquito trap has been specifically designed with all these issues in mind.

PRO 900 series PREMIER mosquito traps are ideal for use in small to medium sized yards and can attract mosquitoes and other common biting insects from as far away as 100 feet.

The unique modular design of the PRO 900 series PREMIER allows the user to easily replace any components - all that's needed is a screwdriver.

Mega-Catch™ PRO 900 series PREMIER mosquito traps come fully assembled - simply position, connect to power, switch on and let Mega-Catch™ go to work.

## Features

- PRO 900 Series PREMIER Mosquito Traps successfully mimic the sensory signals which attract mosquitoes and other common biting insects like sand flies, black flies and biting midges (no-see-ums)
- Designed to be self-serviceable
- Safe 12 Volt 30-foot output cord (from weather proof power supply to trap). The PREMIER can be plugged into any mains power outlet
- 2 catch options (catch bag or liquid catch container)
- Economical operation - uses less power than a 40 Watt light bulb
- Universal input voltage for use anywhere in the world
- Designed to work with or without attractant lures
- Easy one touch operation

# Guard Your Yard

Mosquitoes are more than a nuisance - they carry life threatening diseases. So if mosquitoes have taken over your back-yard, help protect your family with a Mega-Catch™ mosquito trap.

Non-toxic, environmentally friendly and proven to work in independent scientific tests, Mega-Catch™ mosquito traps are a safe and highly effective way to reclaim your yard.

## Box Contents

Catch Container

### MCP-900 PREMIER Mosquito Trap

30 Foot Low Voltage Extension Cord

Catch Bag

Skirt

100-240 Volt AC to 12 Volt DC Weatherproof Power Supply

## Optional Accessories (sold separately)

Stand

### Mosquito Lures

- Mega-Catch™ Octenol Fragrance Strip  
- Mega-Catch™ 3000  
(lures are EPA registered)

60 Foot Low Voltage Extension Cord

Fine Mesh Catch Bag

Car Adapter

Battery Cable

Weatherproof Cover
